

# The Doctrinal Significance of Bible Numbers

## Introduction

The following is a list of numbers that frequently occur in the Bible, along with the doctrinal truth that we find these particular numbers repeatedly associated with in God's Word.

Please understand that this is by no means all of the numbers to be found in the Bible that are associated with doctrinal truths. There are many more numbers that can be gleaned from the Scriptures by checking the numerical value of various words and names which occur in the Scriptures. But the numbers listed are those which occur most frequently in the surface text, and are therefore the easiest to find and use.

Also keep in mind, just as Satan seeks to counterfeit everything else that the Lord has for His people, so Satan and his followers have assigned their own meanings to various numbers in opposition to the true meanings of these numbers in the Lord's "numerical system." Therefore, if you run across a number in this list, that you have been told means something entirely different, be very careful to check out the source of the meaning before you discard the doctrinal significance of these numbers.

The doctrinal meaning of these numbers was sought out by many faithful "men of God" over the past centuries of Christian history, particularly over the past 100 years, and has been checked, double checked, and rechecked many times over. They are a part of the inspired and infallible Word of God, and if carefully studied and prayerfully applied, they will bring great blessings into your Bible study. God bless all of God's people who seriously study the Word and seek the truth.

Pastor F. M. Riley
